1. Claims 1-9, 11 and 14-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, 6 and 17, it appears that the limitation of "a cavity in the plate" is inaccurate since this cavity is not in the plate but it is on the plate. Furthermore, it is unclear how this cavity is interrelated and associated with the cavity and the channel and the anvil. It appears that the anvil and the channel could not form a cavity.

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

2. Applicant's arguments filed on 03/04/03 have been fully considered but they are not persuasive.

Applicants argued that the cavity is the space on plate 26 bounded by the channels and hence by the anvils. However, such critical features have not been recited in the instant claims 1, 6 and 17. Currently, it appears that the cavity is not in the plate and it is still not clear how this cavity is formed.

3. Since claims are indefinite. No art has been applied to these claims.
